solutions

We believe in designing experiences.

ABOUT US

Navixel Solutions is a “one-stop shop” for an affordable and effective end-to-end Travel Booking Systems and various web solutions like website and User Interface Design, Custom Graphic Designs etc. We offer comprehensive services to our clients with 24/7 operational support. Our aim is to understand client requirements and design digital experiences for them which suffice their business needs and help them grow.

SERVICE PORTFOLIO

B2B BOOKING ENGINE

B2B booking search engine is a powerful tool in online market which brings more efficiency, viability to your business with relatively inexpensive cost structure. The user-friendly and autonomous layout of the booking engine enables anyone to operate them unaided from anywhere in the world. The progressive API integration allows it to fetch results from multiple inventories and dispense a wide range of results as per your prerequisites.

B2C SOLUTIONS

Navixel Solutions provides an elementary yet cogent B2C booking solution. Our tool allows customers to browse through a number of travel itineraries which are compiled from various airline vendors. Efficient filters (departure, price, airline etc.) help customers to get concrete and worthwhile results based on their demands. The responsive design and multi-lingual capability make it the best choice in the market.

FARE MANAGEMENT SYSTEM

Navixel Solutions help clients in managing costs with a flexible and efficacious Fare Management system. Our solutions are rich in technology and high in performance. Our B2B & B2C booking engines provide our clients with affordable and cheapest fare options related to their search which nowhere else can be found. FMS provides a central source of valuable travel information and a 360-degree view of the service request management.

OTA'S & AIRLINE API INTEGRATION

XML API is a key part for travel agencies to bring the special contracts in the markets through OTAs. XML APIs are fast streaming parsers what enables you to deal with large volumes of data instantly with marginal memory overhead. Each standard comes completely with an XML schema, offers a complete access to analyze, validate and edit documents before parsing with the help of available tools.

WEB & UI DEVELOPMENT

Convolutd market conditions and frequently changing customer preferences determine the demand for a flexible and adaptable solution. Our team of web engineers, designers and content developers constantly work to upgrade the existing business models to cope up with the ever changing market requirements. At Navixel Solutions, we can manage to work from the simplest static web page to the complex web-based computer applications using advanced technologies.

CUSTOM GRAPHICS

The subtle lines and gentle curves blend to create a classic floating design. The well-researched designs are eye-catching, Creative, flexible, and storyteller what speaks for itself. In current times, it plays a very significant role as it represents the face of the products. Our Custom tailored designs focus primarily on the brand values and visibility to ensure it gets recognized.

SOCIAL MEDIA INTEGRATION

Social networking is benevolently the most popular daily activity for millions of internet users. As an outcome, we observe an expeditious growth in the online sales of various products. Social media integration not only benefits a company's marketing and branding efforts but also help to improve business in all aspects from offering a new product, advertisement, sales, product improvement and handle complaints.

CONTENT MANAGEMENT

A product oriented and well-framed content is the key to the optimization of your web pages in various search engines. Regular research and up-gradation of the contents will route more internet traffic to your sites which eventually would result in more sales and better rating on the search engine tools. Our eloquent content writers will work consistently on the improvements of the web content to achieve the collective motive of revenue gain.
